DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) **17-28**, drawn to a print robot.

Group II, claim(s) **29-32**, drawn to a printing process.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is directed to the special technical features of a carrier with three degrees of freedom, a wrist with two degrees of freedom and a drying device; whereas Group II is directed to the special technical features of positioning a medium, positioning heads of robots for printing to begin, printing an image in successive vertical strips, and returning to rest. It should be noted that for this restriction, claim 29 was interpreted to be an independent claim—however, if claim 29 is interpreted as a dependent claim, then claims 29-32 would be indefinite under 112 second paragraph requirements and improper under 101 requirements since it embraces or overlaps two different statutory classes of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
